Question # 1  Revisit **Choose the best option**

In which of the following scenarios should a Root Cause Analysis (RCA) be performed?

- ☐ Recurring issues with low priority
- ☐ Upon client request for incidents with defined criteria
- ☐ Major incidents causing business impact
- ☐ All of the options

Question # 2  Revisit **Choose the best option**

Which of the following is not true with regard to the change management process?

- ☐ Change coming from a priority 1 incident will always be of emergency category
- ☐ Emergency changes can be implemented even before they are administratively handled in the service management tool
- ☐ An emergency change can not be executed without evaluation for dependency and consequences for other services and customers
- ☐ In every case, emergency change should be tested before implementation

Question # 3  Revisit **Choose the best option**

A company composes a project team of analysts, developers, testers and architects. The company wants the team to adopt Scrum. To do so, they must make a cultural change. What is MOST likely the hardest change for this team?

- ☐ Adopt a set of metrics to measure progress
- ☐ Eliminate the focus on comprehensive documentation
- ☐ Eliminate the throw-it-over-the-wall mentality
- ☐ Adopt a focus on delivering working software

Question # 4  Revisit **Choose the best option**

Tools or frameworks that facilitate source code to be automatically compiled into releasable binaries is known as

- ☐ Build Automation
- ☐ Business Intelligence
- ☐ Environment Fix
- ☐ Monitoring

Question # 5  Revisit **Choose the best option**

In a RACI matrix used for stakeholder management, R stands for:

- ☒ Required
- ☐ Respectable
- ☐ Responsible
- ☐ Requested
- ☐ Clear Response

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 6  Revisit **Choose the best option(s)**

The following data points can be considered for evaluating Risk of Changes

- ☒ Number of components undergoing change
- ☐ Existence of implementers
- ☐ Existence of templates
- ☐ Change implementation duration
- ☐ Clear Response

Join our channel if you haven't joined yet https://t.me/fresco_milestone (@fresco_milestone)

Question # 7 Revisit Choose the best option

Which metric should be focused more for standardization of changes and deployment automation?

- ☒ Outage Duration (Outage End Time - Outage Start Time)
- ☐ Deployment Duration (Planned End Time - Planned Start Time)
- ☐ Change Risk impact and categorization
- ☐ Change Cycle Time (Change Closure Time - Change Open Time)

[Clear Response](#)

Question # 8 Revisit Choose the best option

New catalogue item has to be added to the existing list of services where TCS is managing the end-to-end IT services for the customer IT Organization. Who should authorize the creation of the service catalogue?

- ☒ Service Catalogue Owner
- ☐ TCS, as there is a new type of skill for TCS
- ☐ Both customer and TCS
- ☐ Customer, if there is a financial impact of provisioning services

[Clear Response](#)

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 9 Revisit Choose the best option

Which of the following is not a type of Change?

- ☒ Emergency Change
- ☐ Normal Change
- ☐ Quick Change
- ☐ Standard Change

[Clear Response](#)

Question # 10 Revisit Choose the best option

The Developers create the sprint goal. What is the role of Product Owner in creating the sprint goal?

- ☒ The Product Owner first describes the business objective of the sprint to the Developers. Based on this, and the selected items for the sprint, the sprint goal is crafted.
- ☐ The Product Owner is not concerned with the Sprint Goal as it is an optional activity for the Developers.
- ☐ The Product Owner is responsible for getting the stakeholders' formal approval for the sprint goal.
- ☐ The Product Owner can change the sprint goal anytime during the sprint. He/she can create a new sprint goal and ask the Developers to work on it.

[Clear Response](#)

Question # 11 Revisit Choose the best option

Escalation Matrix should contain the details of the following stakeholders:

- ☐ Both TCS and Customers stakeholders
- ☐ TCS stakeholders only
- ☐ No stakeholder details are required to be documented as you know all the stakeholders personally
- ☐ Customer stakeholders only

Question # 12 Revisit Choose the best option

On a Monday Morning, you are part of a major outage. As part of troubleshooting it has been observed that there were five changes which got deployed into production. You have identified two changes which could have potentially caused outage. What should be the order of changes to be rolled back?

- ☐ Changes should be backed out based on probability of failure
- ☐ As there are multiple changes we can not rollback any change
- ☐ Change which was deployed last should be backed out first
- ☐ Roll back both the changes

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 13 Revisit Choose the best option

What type of change is most likely to be managed by the service request management practice?

- ☒ An emergency change
- ☐ A normal change
- ☐ An application change
- ☐ A standard change

[Clear Response](#)

Question # 14 Revisit Choose the best option(s)

TCS Location Independent Agile™ is about (select all that apply)

- ☒ How distributed agile teams, each team itself being co-located, should collaborate
- ☐ How to distribute work among team members distributed across different time zones
- ☐ Harnessing globally available talent
- ☐ How an agile team can be distributed and yet perform without compromising on agility

[Clear Response](#)

Question # 15 Revisit Choose the best option

You are leading a transition of a large operations support. During transition phase, when knowledge transition is in progress, should you ask for the incumbent vendors' Known Error Database (KEDB)?

- ☒ Yes, you should request for the KEDB, receive and enhance it further as per TCS standards, with additional known errors and keep it updated always
- ☐ No, you should always create a fresh KEDB from scratch
- ☐ Yes, to solve the issues during secondary support stages
- ☐ No, it would be a security violation to request for their KEDB

[Clear Response](#)

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 16 Revisit Choose the best option

What are the ways to manage the shifts effectively with zero impact on business?

- ☒ All of the options
- ☐ Ensure that the team has relevant knowledge to prioritize the tasks based on SLAs or deliverables
- ☐ Ensure that the shift handover / takeover procedures are followed
- ☐ Ensure that all the team members are aware of their roles and responsibilities assigned for the shift

[Clear Response](#)

Question # 17 Revisit Choose the best option

The sprint has ended. The development team has not completed any of the product backlog items selected for the sprint. What would be the next step?

- ☒ End the sprint with a retrospective, since scrum favors time boxing
- ☐ Extend the sprint since scrum favors tasks getting done
- ☐ Request the Product Owner to accept the completed portion of the incomplete product backlog items and plan to complete them by next sprint, since scrum favors empowered teams

[Clear Response](#)

Question # 18 Revisit Choose the best option

When multiple scrum teams are working on a same product, how many Product Owners and Product Backlogs are needed?

- ☒ Multiple Product Owners and multiple Product Backlogs
- ☐ One Product Owner and one Product Backlog
- ☐ Multiple Product Owners and one Product Backlog
- ☐ One Product Owner and multiple Product Backlogs

[Clear Response](#)

Question # 19 Revisit Choose the best option

Which of the following risks will be identified through RIO Risk Identification exercise?

- ☒ None of the above
- ☐ Only customer related risks
- ☐ Only TCS operational risks
- ☐ Operational Risks (both customer and TCS related)

[Clear Response](#)

Question # 20  Revisit **Choose the best option**

When does a product backlog retire?

- ☒ When the product owner retires
- ☐ When the customer provides sign-off on completion of project
- ☐ When the product retires
- ☐ When all the sprints are over

[Clear Response](#)

Question # 21  Revisit **Choose the best option**

The process of granting users the right to use a service and system to manage the confidentiality, availability and integrity of the organization's data and IP

- ☒ Transition Management
- ☐ Competency Management
- ☐ Access Management
- ☐ Knowledge management

[Clear Response](#)

Question # 22  Revisit **Choose the best option**

It is a secure logical library in which the definitive, authorized versions of all software media configuration items are stored and protected

- ☒ Integration Library
- ☐ Configuration Management Database
- ☐ Definitive Media Library
- ☐ Software Configuration Library

[Clear Response](#)

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 23  Revisit **Choose the best option**

A team wants to use Planning Poker to estimate effort to achieve sprint goals. What will be the BEST recommendation?

- ☒ Use when estimating a large number of items with a large group of participants
- ☐ Use to find similar user stories and group them together to visualise the estimation
- ☐ Use numbered playing cards to estimate a relative small number of items in a small team
- ☐ Use an informal and quick way to get a rough feeling about the total size of the backlog

[Clear Response](#)

Question # 24  Revisit **Choose the best option**

Any highest-impact, highest-urgency issue for which the degree of impact on the business/organization is mid-way between a normal incident and a disaster

- ☒ Normal Change
- ☐ Service Request
- ☐ Major Incident
- ☐ Standard Process

[Clear Response](#)

Question # 25  Revisit **Choose the best option**

During the transition, who will sign the Toll gates to move from one stage of transition to another stage?

- ☒ Toll gate will be signed in agreement with all the above stakeholders
- ☐ TCS Transition Manager
- ☐ Customer Transition Manager, since they are the approvers
- ☐ Outgoing Vendor Transition Manager

[Clear Response](#)

Question # 26  Revisit

What would be a standard way for anyone outside an agile team (for example, Delivery Partner of the account, Head of the Enablement Function) to get the status of the work at any point in time?

Choose the best option

- ☒ He/she can have a status review meeting whenever required
- ☐ He/she can talk to each team member daily to understand the status
- ☐ All team members need to send email updates to him/her daily
- ☐ He/she can refer the physical/digital Kanban board, which is maintained by the team

Clear Response

Question # 27  Revisit

The Business Unit Head wants the Developers to include a highly critical feature in the current Sprint. What should the Developers do?

Choose the best option

- ☒ Ask the Business Unit Head to work with the Product Owner.
- ☐ Work on that feature since an Business Unit Head's priority is of utmost importance.
- ☐ Work on that feature if the Scrum Master approves it.
- ☐ As an empowered team, identify a backlog item in scope for current Sprint that may be dropped to accommodate this critical feature.

Clear Response

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 28  Revisit

When do you test the Business Continuity Plan (BCP)?

Choose the best option

- ☒ When BCP situation is declared by the Crisis Management Leader (CML)
- ☐ When I am unable to access the application due to link issues
- ☐ When BCP is first created
- ☐ Regularly as part of mock drills using mechanism such as Table Top and Call-Tree exercises

Clear Response

Question # 29  Revisit

As a self-organized and empowered team, the developers in a scrum team decides which business needs are to be developed during the sprint.

Choose the best option

- ☒ False
- ☐ True

Clear Response

Question # 30  Revisit

In the middle of the sprint, Development team identifies a defect. Initially, they were not sure about the cause of the defect, and hence they involved the Product Owner to discuss it. After the discussion, both the Product Owner and Development team agreed that the defect is indeed a clear gap in the feature being developed in their sprint and not a new requirement. The defect should be

Choose the best option

- ☒ Deferred to the Product Backlog since it is a new requirement
- ☐ Fixed in the current sprint
- ☐ Deferred since this is not a critical defect

Clear Response

Question # 31  Revisit

The Scrum Master asks the team to decide the best way to organize themselves. The team decides to have their most senior developer make all decisions, because she is the most experienced and knowledgeable team member. Should the Scrum Master accept this decision?

Choose the best option

- ☐ No, because self-organization means all decisions should be made together
- ☐ Yes, because it is up to the team to decide on the decision-making process
- ☐ Yes, because the team needs a single person to make all decisions
- ☐ No, because within Scrum decisions can never be made by a single person

Question # 32  Revisit

The Scrum Masters for a group of Development teams want their Daily Scrum meetings to be effective. Lately, the Development Teams are seeing issues with some integration points between the different Development Teams and are trying to solve their integration problems during their Daily Scrum meetings. As a result, the Scrum Master is spending an excessive amount of time discussing these issues with everyone, which is not a productive use of time. What is the correct meeting to solve integration problems on multi-team projects?

Choose the best option

- ☐ The Sprint Planning meeting
- ☐ The Sprint Retrospective meeting
- ☐ The Scrum-of-Scrums
- ☐ The Sprint Review meeting

Question # 33  Revisit **Choose the best option**

Who is accountable to maintain the exceptions provided for the SLAs during the monthly service delivery review for future references ?

- ☒ Incident Manager
- ☐ Service Management Lead
- ☐ Service Level Manager
- ☐ Service Delivery Owner

[Clear Response](#)

Question # 34  Revisit **Choose the best option**

Raj joins a project team that attempts to build a consumer device with embedded software. The team is adopting two weeks sprint. Raj notices that the project must produce an outcome that will be highly adoptable by the users to become successful. After every sprint review, the Product Owner keeps changing the product vision and makes contradictory statements about user needs. What can be suggested for this environment?

- ☒ Apply waterfall and have the Product Owner sign-off on the requirements
- ☐ Adopt practices from Extreme Programming
- ☐ Apply design thinking first for initial phase and then bring in Agile later

[Clear Response](#)

Question # 35  Revisit **Choose the best option**

Four new employees joined customer organization. The IT support team have created new accounts and provided these new employees with 20 GB of storage space to each one of them. What best describes the activity performed by IT support?

- ☒ Service Provisioning
- ☐ Service Offering
- ☐ Complain Resolution
- ☐ None of the above

[Clear Response](#)

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 36  Revisit **Choose the best option**

After John checked-in his code, the continuous integration server showed that the latest integration had failed a few acceptance tests. Jack found that this failure was caused by a change in the interface between the code maintained by Jack and the code maintained by Jill. What could Jack do in the future?

- ☒ Instead of a merging and synchronizing the code, the team can adopt a version control that allows each developer to lock and release lock when making changes.
- ☐ He can synchronize his code with the code in the version control and can run the acceptance test himself before check-in.
- ☐ There is no better alternative. John can continue with the current process.
- ☐ He can discuss with other developers before checking in the code

[Clear Response](#)

Question # 37  Revisit **Choose the best option**

What should be done to reduce or remove alerts?

- ☒ Differentiate alerts for critical applications, which need focused monitoring or immediate attention
- ☐ All of the above
- ☐ Perform trend analysis of all alerts
- ☐ Perform regular review of all alerts

[Clear Response](#)

Question # 38  Revisit **Choose the best option**

Scrum allows having gaps between two subsequent sprints, in which the team can accomplish support activities and team building activities

- ☒ False
- ☐ True

[Clear Response](#)

Question # 39  Revisit Choose the best option

An Agile team has different team members working on the same codebase in parallel. How can continuous integration help them?

- ☒ Helps the team to simultaneously work on same codebase and integrate often.
- ☐ Maintaining a list of artifacts checked out, and creating alerts about potential conflicts when they are checked back in.
- ☐ Verifying if the new version of code fulfils the business objective.
- ☐ Detecting if the code is being committed continuously.

[Clear Response](#)

Question # 40  Revisit Choose the best option

Team A has a velocity of 60 story points but could not demo a product due to a glitch but have consistently increased their velocity over last sprint. Team B has a velocity of 50 story points. Of late, Team B's velocity decreased to 40 and they demoed their product continuously. Which team is more matured in agile?

- ☒ Team A
- ☐ Team B

[Clear Response](#)

Note: This file is posted in our channel for free. (https://t.me/fresco_milestone).

Question # 41  Revisit Choose the best option

A good Scrum Master is responsible, humble, collaborative, committed, influential, and knowledgeable. A Scrum Master tells one of the team members how proud she is of all the team members and mentions everyone's contribution. Which of the four attributes does this Scrum Master demonstrate?

- ☒ Humble
- ☐ Responsible
- ☐ Knowledgeable
- ☐ Committed

[Clear Response](#)

Question # 42  Revisit Choose the best option

A Product Backlog is ordered by

- ☐ Whatever increases the overall value of team's work
- ☐ Whatever is deemed as appropriate by technical and domain experts
- ☐ Individual Product Backlog item's value
- ☐ Whatever is deemed as appropriate by Product Owner

Question # 43  Revisit Choose the best option

A well documented agreement between service provider and customer that defines required services and expected performance level of services is known as _____

- ☐ Customer Feedback
- ☐ Project Charter
- ☐ Project Plan
- ☐ Service level Agreement

Question # 44  Revisit Choose the best option

Identify the practice that involve analysis of patterns of potential issues, assessment of flow volume, and resolution time taken to improve operation efficiency

- ☐ Ticket Analytics
- ☐ Change management
- ☐ Problem Control
- ☐ Data fix

Question # 45  Revisit **Choose the best option**

As a Developer, how would you best describe your interaction with the Product Owner?

- ☒ You interact directly with the Product Owner only when you are asked by your Team Lead to do so.
- ☐ You do not interact directly with the Product Owner. You share your queries with the Team Lead who then discusses them with the Product Owner and gets back to you.
- ☐ You interact with the Product Owner directly but only during Sprint Planning and Sprint Review.
- ☐ You interact with the Product Owner during Sprint events as well as whenever you have queries / suggestions regarding the requirements.

[Clear Response](#)

Question # 46  Revisit **Choose the best option**

Based on the learnings from previous sprints, the scrum team decides to revisit the length of the sprint. What is the appropriate scrum event to discuss and agree on the change?

- ☒ Retrospective
- ☐ Sprint Planning
- ☐ Product Backlog Grooming
- ☐ Daily Scrum

[Clear Response](#)

Question # 47  Revisit **Choose the best option**

The architectural features of the product need to be

- ☒ Decided at least at skeleton level in sprint zero
- ☐ Completely designed upfront before the start of sprint
- ☐ Evolved along with sprint deliveries

[Clear Response](#)

Question # 48  Revisit **Choose the best option**

An application has undergone a massive upgrade along with technology and infrastructure. What are the tests that should be mandated to ensure there are no issues when multiple users are logging simultaneously?

- ☒ Operational Acceptance Testing
- ☐ Integration Testing
- ☐ User Acceptance Testing
- ☐ Performance Testing

[Clear Response](#)

Question # 49  Revisit **Choose the best option**

The team has an average historical velocity of 20 and the project is currently in the initial product definition phase. What will be the range of the Team's Velocity?

- ☒ 12 to 32
- ☐ There's no range; the Velocity is 20
- ☐ 14 to 28

[Clear Response](#)

Question # 50  Revisit **Choose the best option**

Developers in three scrum teams are working as part of a big project to develop a product. When sprints are in motion, there will be

- ☒ One product backlog, and three sprint backlogs.
- ☐ Three product backlogs and three sprint backlogs
- ☐ Three product backlog and one sprint backlog
- ☐ One product backlog and one sprint backlog
